github.com/Jedrzej-Wydra

Lawyer and data scientist combining expertise in legal theory, advanced analytics, and applications of ML in forensics.

as latest degree from
Adam Mickiewicz University

Engaged in interdisciplinary initiatives that bridge law, technology, and forensic science.

SKILLS AND TECHNOLOGIES

The core of my work lies in research and mathematical modeling.

LANGUAGES

Polish (native)

English

Mathematical modelling

Projects

Consulting

Design

Research

Python

Statistics

R

AI

LaTeX

Forensic Science

I mainly use R and Python for statistical analysis and mathematical modeling in evaluating forensic evidence. Currently, I also focus on the legal aspects of AI.

My work frequently involves applying machine learning methods and functional data analysis (fda).

ACTIVITIES

10
publications

spanning **scientific research** and **popular science**

Outside of work, I explore psychology, practice calisthenics, and drink lots of tea and more – from matcha to yerba mate, but never coffee. Always striving to keep the balance of the Force.
